A recommendation system for marketing team to analyze reviews

By Jason W

Video Games Industry Market Size

Video Games Industry has been rapidly growth over the past decade and almost double the market size from 2011 to 2021

PROBLEM

Pricing

Too many similar products on the market with competitive pricing

Inconsistencies, glitches, bugs, bad quality assurance

Quality

Lifecycle

Some products are designed for only short term

GOAL

Build a **Recommendation System** to helps marketing team

Figure out what users most **important needs** for each product category

Competitive product features advantage among competitors

Longevity of product **lifecycle** by picking the right materials

DATA & PRE-PROCESSING

Dataset

~2M Video Games
reviews from Amazon
(picking 10k reviews
randomly from the
dataset)

Tools
